CORE COMPETENCIES

- Infrastructure Transformation
- DevOps Enablement
- Platform Engineering
- Terraform & Ansible
- Azure DevOps / CI-CD
- Hybrid & Cloud Architecture
- FinOps
- Landing Zone & IAM Design
- BCP / DR Planning
- Stakeholder & CXO Engagement
- Enterprise Automation Strategy
- Database Architecture
- DB Migration & Performance
- AIOps (Foundational)

CLOUD & TOOLS

Microsoft Azure | Oracle Cloud (OCI)
Terraform | Ansible | Azure DevOps
Splunk | CI/CD Pipelines
Oracle | PostgreSQL | MySQL
MS SQL Server | IBM DB2
IBM Guardium | IBM Optim

Azure Solution Architect Associate

Microsoft
Dec 2018 – Present

OCI Certified Architect Associate

Oracle Cloud Infrastructure
Sep 2023 – Present

PROFESSIONAL SUMMARY

Strategic Hybrid Infrastructure Transformation & Automation Leader with **20+ years of IT experience** spanning enterprise infrastructure modernization, DevOps transformation, cloud enablement, platform engineering, and database architecture. Experienced in guiding organisations through the full hybrid journey — from legacy stabilisation and database modernisation through to cloud enablement and DevOps transformation. Proven record of aligning technology with business outcomes across **BFSI, government, and insurance sectors**. Experienced in CXO and enterprise architect engagement, governing team of engineers, and building high-performing delivery teams. Unique combination of deep **data architecture expertise** (Oracle, PostgreSQL, SQL Server, DB2) with modern cloud, automation capability.

PROFESSIONAL EXPERIENCE

Technical Architect & Infrastructure Transformation Lead Tata Consultancy Services (TCS) · Brussels, Belgium / Mumbai, India

Nov 2011 – Present
14 Years

HYBRID TRANSFORMATION & CLOUD LEADERSHIP

- › Led enterprise-scale **DevOps and infrastructure transformation programs** across 10+ cross-functional infrastructure and application teams leveraging PaaS, DevSecOps, and FinOps frameworks.
- › Partnered with **CXOs, Delivery Managers, and Enterprise Architects** to define and execute multi-year strategic roadmaps aligned with business growth and cost objectives.
- › Architected **hybrid and multi-cloud environments** using Terraform, Ansible, Azure DevOps, and cloud-native services (Azure, OCI); designed secure Landing Zone architectures with IAM governance.
- › Designed and governed **hybrid infrastructure bridging legacy on-premise systems with cloud-native platforms** — enabling organisations to modernise at their own pace without disrupting critical operations.
- › Delivered **~€3.9M in cost optimization** over 5 years through automation, license consolidation, workload rationalization, and infrastructure efficiency improvements.
- › Spearheaded **15+ automation initiatives**; drove person-day reduction, activity profiling, and operational efficiency programs with an ongoing pipeline of automation opportunities.
- › Oversaw BCP and DR planning, legacy refresh, SLA adherence, and **platform modernization** across critical enterprise systems.

PEOPLE & DELIVERY LEADERSHIP

- › Guided and mentored **team of engineers, leads, and delivery teams** toward DevOps, IaC, and automation adoption; fostered a culture of engineering excellence and continuous improvement.
- › Cross-functional influence spanning 10+ infrastructure, application, and operations teams; drove process optimisation initiatives including VM provisioning and Azure DevOps project space automation (CR, repo, RBAC, pipeline), reducing delivery turnaround by 60%, bridging technical execution with business stakeholder expectations.

KEY CLIENT SECTORS

Belgium
National Public Transportation Authority
(Government)

Middle East
Largest Government Bank in the Region
(BFSI)

India
Leading Insurance Provider & Multiple
Banking Clients

Singapore
Financial Services Client (Automation)

APAC
Enterprise Clients – Data Security & DB
Architecture (IBM)

EDUCATION

KEY PROJECT HIGHLIGHTS

- › **Belgium – National Public Transportation Authority:**
 - Led infrastructure transformation and DevOps enablement across a large-scale public sector IT landscape; drove cloud modernization and SLA improvement initiatives.
- › **Middle East – Largest Government Bank (Database Migration Lead):**
 - Migrated multiple mission-critical Oracle databases to high-availability environments; responsible for end-to-end design, implementation, and performance tuning.
- › **India – Leading Insurance Provider & Banking Clients (Database Tower Lead):**
 - Managed 24/7 operations support team delivering critical database services in a high-demand shared services model.
- › **Singapore – Financial Services Client (Automation):**
 - Delivered production-grade monitoring automation using Splunk and Ansible; improved operational visibility and reduced manual intervention significantly.

Senior Database & Security Solutions Specialist

Oct 2008 – Oct 2011

IBM · Mumbai, India

3 Years

- › Developed and implemented tailored **data security and archival strategies** for APAC clients using IBM Guardium and IBM Optim Archive; ensured compliance with GDPR and PCI-DSS requirements.
- › Led **end-to-end PoC testing** for IBM Guardium and Optim Archive, validating effectiveness in securing structured data within mission-critical enterprise systems.
- › Conducted high-impact **client workshops and technical demonstrations** on data protection and lifecycle management across large enterprise environments.
- › Directed full-scale **Oracle database upgrade projects**; identified and resolved performance bottlenecks, implementing tuning strategies to enhance infrastructure stability and response times.
- › Executed and validated **Disaster Recovery (DR) plans** including live switchover testing, ensuring database resilience aligned with business continuity objectives.
- › Provided ongoing **DBA support for core banking systems** — performance tuning, availability management, and production/DR issue resolution.

Database Implementation Specialist

Nov 2006 – Oct 2008

Infrasoft Technologies · Mumbai, India

2 Years

- › Contributed to **Core Banking System (CBS) infrastructure implementation** — installed and configured Oracle, Microsoft SQL Server, and IBM DB2 databases across production environments.
- › Executed **database migration activities** ensuring minimal downtime and full data integrity during cutover to upgraded systems.
- › Conducted **performance benchmarking** of new hardware and database platforms to optimize Transactions Per Second (TPS) and align with business demands.
- › Collaborated with cross-functional teams (application developers, system administrators) to ensure smooth deployment and integration of database solutions.
